multi-user computing

OfficeStation™

NET STAR PRO

NET STAR 2

Support USB Flash Memory
(NetStar Pro Only)

Overview

The market of server based computing is growing together with the need of companies and end users for individualized, benefit-oriented and low cost IT solutions. The PC as Do-it-all weapon for all IT workplaces belongs to the past. Terminal server/thin client solutions have been successfully established and fulfill their task as much lower Total Cost of Ownership(TCO). At the same time they offer additional ecological, ergonomic and security relevant advantages. The increasing demand for thin clients is a distinct signal for a market differentiation in the traditional PC market. The OfficeStation as all-in-one plug & play ultra thin terminal open the doors to new markets, which remained closed to the server based computing so far due to its complexity. OfficeStation is the ideal option of a terminal product for you to enlarge the number of your workplaces.

What is OfficeStation?

OfficeStation is the world's first terminal unit that does not require a CPU, hard-drive, or CD-ROM yet executes as if it's an ordinary PC. With OfficeStation exclusive UTMA (UltraThinMultiAccess™) technology, OfficeStation allows you to connect your existing PC with up to 10 computer terminals (or 30 computer terminals using Server OS)†.

How Does OfficeStation Work?

Your existing PC is being under utilized (see CPU usage diagram right), each OfficeStation is programmed to access the host PC's excess computing power. By utilizing Windows 2000/XP's multiuser feature with UTMA technology, each OfficeStation terminal can operate like a separate PC terminal without decreasing the overall performance of either the host PC or each OfficeStation terminal. Therefore, each OfficeStation can run every application from the host PC independently and securely.

A typical CPU being under utilized

Network Setting

Home Setting

Enjoy the benefit of additional computing capabilities with just one host PC. Family members can browse the Internet and work on reports at the same time without having to fight over the same computer.
*You can also use a HomePlug (via Powerline) adapter instead of CAT5 cable.

Office Setting

There will be great savings on hardware cost as well as an IT maintenance when an OfficeStation network terminal solution is implemented. Multiple host PCs can be connected in the same corporate network environment for department/group computing.

Wireless Setting

Take the benefit of an OfficeStation solution to the next level by adding wireless protocol.
*802.11g wireless router and bridge required.

Benefits of the OfficeStation

Cost effective

Save up to 80% of your hardware cost versus buying a P4 or equivalent PC, OfficeStation gives any office or home users to expand an existing Host PC easily and affordably.

No maintenance required

You only have to maintain and upgrade the Host PC, OfficeStation requires no hardware maintenance, only occasional software updates.

Compatibility

OfficeStation will run Windows based applications on your Host PC; internet browsing, email, office suites, most games and much more.

Simultaneous Windows operation

Both Host PC and OfficeStation terminals can run independently and execute same application programs separately.

(Additional software license may be required)

Small sleek design

Space saving design allows more room for your office or desk area.

Remote control

Because OfficeStation employs TCP/IP based standard and Ethernet protocol, you can access your office/home PC from anywhere in the world via the internet.

(Fast broadband and public IP may be required)

Secure and Fast

Our proprietary Terminal Protocol allows for a fast and secure environment using image caching and 128 bit encryption.

Ready to go

Each OfficeStation includes the NCT Enterprise Terminal Server Suite free of charge. No additional software required!

No noise output and low power consumption

Quiet operations while saving energy costs. (5 watt usage only)

Supports high resolution monitor display

640x480, 800x600, 1024x768, 1280x1024, 16 bit color (65,536 colors).

* USB Memory Port (NetStar Pro Only)

OfficeStation NetStar Pro provides memory port for USB flash memory device connection.

Hardware Specification

Dimension and Weight

243mm (W) x 135mm (D) x 40 mm(H), 320g

PROTOCOL & OPERATING SYSTEM

WoIP(Windows® over IP) for Windows® XP Home/Professional, Windows® 2000 Professional, Windows® 2000 Server, Windows® Server 2003, Media Center Edition, Linux*

MINIMUM SYSTEM REQUIREMENTS

Host PC with at least :

- CPU : Any PC with 2 GHz processor or higher (Recommended Hyper-Threading Technology)
- RAM : 512 MB RAM or above
- Keyboard, Mouse, Monitor and Speaker are required for each station.
- 100Base-TX Fast Ethernet switch for connecting stations and PCs (or crossover for 1:1 connection)

*Some restrictions apply. See website for details.
